REMARKS

**RETURN TO CIA**

1. The Bratislava-Ivanka (P 49/Y 09) civilian airfield was approximately 1,700 x 2,200 meters. ☐ The level ground had a broken stone base and a grass surface. There was a concrete runway, 70 x 1,200 meters, which extended from N.W. by S.E. Another perpendicular runway about 1,000 meters long was presumably under construction. A dug-out strip of land was seen at the field in August 1950. ☐ 50X1-HUM
2. The airfield was scheduled to be completed by late 1951. No aircraft were seen at the field. ☐ 50X1-HUM
3. Buildings at the field included an administration and flight control building which was completed, three buildings which were nearing completion, and more buildings, possibly hangars, still under construction. ☐ 50X1-HUM

**CONFIDENTIAL**CLASSIFICATION ~~SECRET/CONTROL/US ONLY~~

This document is hereby regraded to CONFIDENTIAL in accordance with the letter of 16 October 1978 from the Director of Central Intelligence to the Archivist of the United States.
